

# Career Coach Smart Contract README

**Repository:** <https://github.com/aseoff/introduction-to-smart-contracts>

## Members

- Jesse Aseoff
- Ethan Tarnarider

## Project Description

CareerCoach is an open-source software designed to help job seekers navigate the complex process of job searching. Our platform provides an all-in-one solution to job seekers to manage their job search process efficiently. The software will enable job seekers to track their applications, their status, and notes about the jobs. In addition, it will provide useful tips and suggestions to improve their resume and cover letters, based on the requirements of the job they are applying for.

This repository contains the smart contracts used in the careerCoach platform.

## Requirements

- Node.js (v14 or later)
- Solidity Compiler (v0.8.4)
- Hardhat (v2.6.4)
- OpenZeppelin Contracts (v4.3.2)

## Instructions to Run the Code

1. Clone this repository.
2. Run npm install to install the dependencies.
3. Run npx hardhat compile to compile the smart contracts.
4. Run npx hardhat test to run the tests.

## Deployment Link

The careerCoach smart contract has been deployed to the Goerli Testnet and can be viewed [here](#)

Please note that this contract is for demonstration purposes only and should not be used for actual job applications.
